AN ULTRA WIDE BASE TIRE THAT DELIVERS SUPERIOR TRACTION AND HIGH MILEAGE

A trusting tire makes a difference in extreme driving conditions, and the 902L™ UWB has all the qualities to rely on. Its innovative tread design provides maximum traction and even weight distribution for stable tread wear, while its enhanced rubber compound and casing design deliver low rolling resistance and increased retreadability.

CONSTRUCTED FOR LONG, EVEN WEAR

- The 902L UWB’s deep 27/32” tread depth delivers maximum mileage and extra-long treadlife.
- Optimal eight-rib block and sipe tread design contributes to an optimal footprint, enhanced lateral stability and long, even wear.

ADVANCED DESIGN FOR FUEL EFFICIENCY AND TRACTION

- Our advanced rubber compound lowers rolling resistance and reduces heat buildup, allowing for superior fuel economy.
- The specially engineered small block and sipe combo reduces heel-toe wear and increases fuel efficiency, all while providing confident snow traction.

COMPLETE WITH TOUGH CASING DESIGN

- Our scientifically advanced casing is created specifically to reduce strain and prevent casing growth, allowing for retread after retread.
- Zero Degree Belt provides weight distribution for even pressure and increased treadlife, ensuring the most stable footprint possible.
- Dual sipes improve acceleration and braking on ice, offering exceptional control under severe conditions.

IT’S IN OUR DNA.

Our innovative business philosophy, SmartSolution,” is our commitment to meeting the most essential demands of today’s fleets: Longevity, Efficiency, Availability and Dependability.

SmartWay® Verified

Our 902L UWB is one of many Yokohama tires designed to meet SmartWay’s stringent low rolling resistance criteria.
