YOKOHAMA EMERGENCY SERVICE (YES)
Offering nationwide emergency service, we’re focused on keeping your cargo on the move—24/7/365.

YOKOHAMA IS A SMARTWAY® TRANSPORT PARTNER
Working with the SmartWay program, we’re committed to accelerating the availability, adoption and market penetration of advanced fuel-efficient technologies and operational practices in the freight supply chain helping you save fuel, lower costs and reduce adverse environmental impact.

THE YOKOHAMA DIFFERENCE
When you do business with us, you get more than just a world-class tire engineered by some of the industry’s best. You also get a partner committed to delivering efficient products and solutions to help your business run more smoothly and more profitably. Our industry-leading support network truly makes Yokohama the SmartSolution.

SMARTSOLUTION® CERTIFIED PROGRAM
Each of the dealers that make up our expansive nationwide service network is selected and certified to ensure they’re ready to provide the solutions you need fast.

THE ALL-NEW 712L BUILT FOR LONG-HAUL FUELEFFICIENCY
Yokohama knows that when it comes to designing long-haul tires, it’s not just durability you’re looking for, it’s also top-tier fuel efficiency. That’s exactly why we built the all-new 712L™: a fuel-efficient, deep-tread drive tire that delivers even tread wear and extended service life.

**LONG-LASTING, FUEL-EFFICIENT, DEEP-TREAD DRIVE TIRES**

Yokohama knows that when it comes to designing long-haul tires, it’s not just durability you’re looking for, it’s also top-tier fuel efficiency. That’s exactly why we built the all-new 712L™: a fuel-efficient, deep-tread drive tire that delivers even tread wear and extended service life.

**DEEP GROVE DEPTH**
Our 712L tires have 30/32” deep groove depth for long-lasting life and traction without sacrificing fuel efficiency.

**FLAT TREAD PROFILE**
A flat footprint controls ground contact pressure and improves resistance to irregular wear.

**LONG-LASTING WEAR**
Stress Control Grooves reduce contact pressure at the tread edge, providing increased resistance to shoulder step-down wear and promoting long even wear.

**OPTIMAL TRACTION**
Straight and Angled Sipes, as well as Zig Zag Intermediate Grooves, provide greater radial and lateral traction.

**FUNNEL-SHAPED GROOVES**
Funnel-shaped grooves prevent stones and other debris from reaching the bottom of the groove where casing damage can occur.
